The best beers deserve the best RONA glasses

Many ancient cultures around the globe discovered how to brew beer. In fact grain was used to make beer before it was used to make bread. In recent years there has been a huge explosion of interest in beer as evidenced by the tens of thousands of micro-breweries that have sprung up, as well as the remarkable increase in home brewing.

Glass making is also an ancient industry and art form. The creation of vessels from which to drink these beers has also advanced through the years. Today there are many shapes available. Whether drinking a classic Czech lager, a Trappist ale, an IPA, or the new rye beers, your enjoyment will be enhanced by using the Rona glasses pictured here.

Rona glasses all have fine, cold-cut rims, and thin walls which add to your drinking pleasure. The shapes help capture the foam and aid the release of carbonation. The Rona glass clarity allows esthetic enjoyment of the many hues. It is simply a matter of choosing an appropriate glass for your beer variety of choice. ENJOY
